EDUCATION

Estacio University

Bachelor of Science in Systems Analysis and Development

January 2023 – June 2025

Estacio University

Bachelor of Digital Marketing and Publicity

February 2019 - December 2020

WORK EXPERIENCE

Medkan

Software Engineer

Brasilia, DF, Brazil

August 2023 - Present

- In charge of for full-stack software development, primarily focusing on medical-related products. My work encompasses a wide range of tasks, including creating landing pages and developing mobile applications.
- React . React Native . MongoDB . JavaScript . HTML . CSS . WordPress . Python . Django . SQL . Docker . AWS

Freelance

Software Engineer

Remote

April 2023 - Present

- Using languages such as JavaScript and React, I create the interface that users see and interact with. This includes elements such as buttons, forms, animations and other visible parts of the system. I'm also able to make these parts interact dynamically and responsively.
- As far as the back-end is concerned, I use technologies such as SQL/MongoDB to manage and organise the databases, and Python in conjunction with Django or JavaScript with NodeJs to create all the logic and structure that support the functioning of the website or application. It's like the "brain" behind the operations.
- To ensure that the work is organised and well managed, I use Git, a tool that helps with version control of the code and efficient collaboration with other developers.
- Finally, as a full-stack freelance developer, I can provide complete and functional solutions to my clients, taking care of everything from the look and feel to the inner workings of the project.

Revittá

CEO

Bahia, Brazil

January 2020 - February 2022

- In this personal project I performed various roles, as well as being CEO I was able to develop as a designer, traffic manager and customer support, in addition to other responsibilities in the field of digital marketing.

MAJOR PROJECTS

Code FTW

September – December
2023

CodeFtw is a platform focused on teaching technology in a direct and effective way.

- I was selected to take part in a group mentoring program run by CodeFtw with the aim of developing my technical and personal skills. The project is based on JavaScript, React and Meteor technologies. In this project we are working to fix bugs in the platform, make the repository open and implement improvements to the site.

Black Scorpion Software

October 2023 – October
2024

Black Scorpion Software excels at processing medical images in line with DICOM standards and technologies to help develop medicine.

- I was selected to take part in a group mentoring program run by Black Scorpion Software with the aim of developing my technical and personal skills. The curriculum includes classes in discrete mathematics, linear algebra, statistics and data science, programming logic, English, interpersonal skills and more.
